

# How to enter your API / Leverage / Lot Size in your customer portal

Enter your API keys into your customer portal by clicking the "API Configuration" tab on the left side of the customer portal. The API keys allow our trading system to connect to your Binance.com account to place and close trades.

## FUTURES API

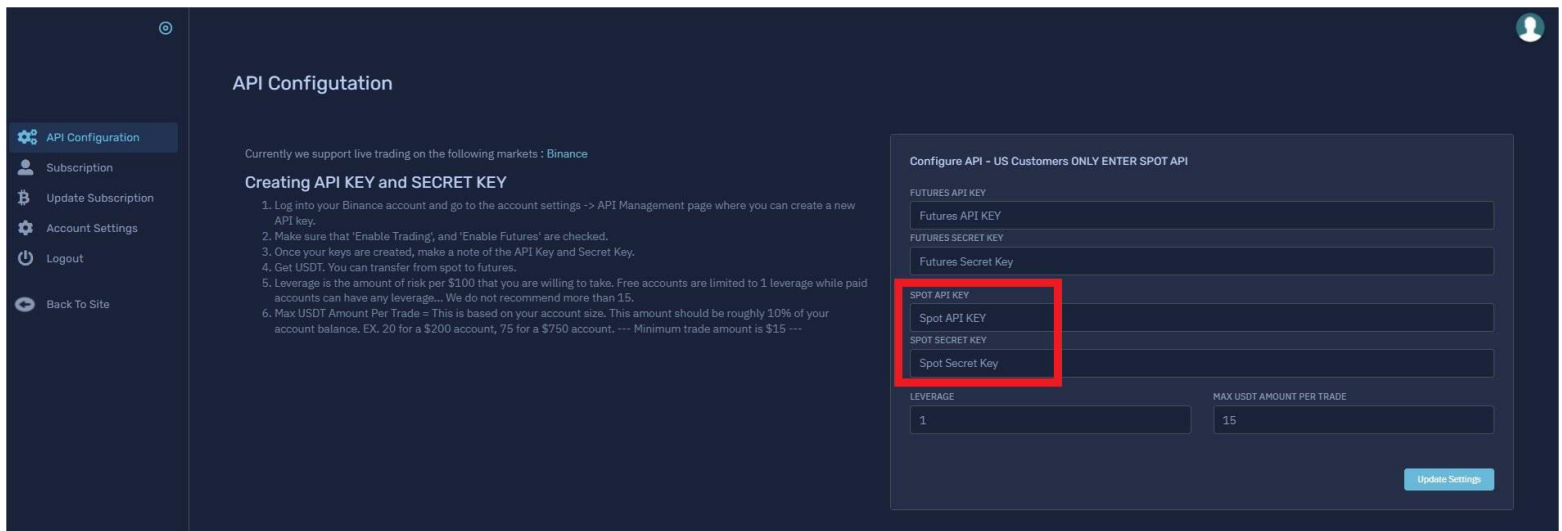

For Futures trading accounts please enter the API / Secret keys here...

The screenshot shows the "API Configuration" page in a customer portal. On the left is a navigation menu with "API Configuration" selected. The main content area is titled "API Configuration" and includes instructions for creating API keys. A form titled "Configure API - US Customers ONLY ENTER SPOT API" is displayed on the right. This form has two sections: "FUTURES API KEY" and "SPOT API KEY". The "FUTURES API KEY" section contains three input fields: "Futures API KEY", "FUTURES SECRET KEY", and "Futures Secret Key". These three fields are highlighted with a red rectangular box. Below this, the "SPOT API KEY" section has three input fields: "Spot API KEY", "SPOT SECRET KEY", and "Spot Secret Key". At the bottom of the form, there are two input fields for "LEVERAGE" (set to 1) and "MAX USDT AMOUNT PER TRADE" (set to 15). An "Update Settings" button is located at the bottom right of the form.

## SPOT API

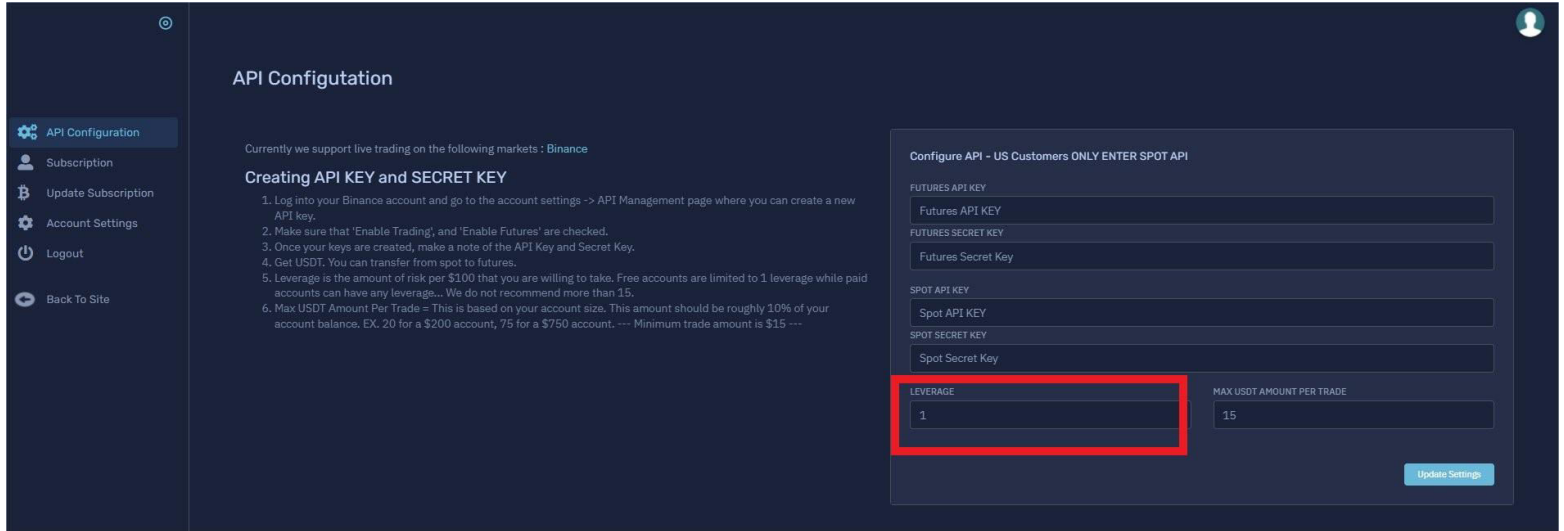

For Spot trading accounts please enter the API / Secret keys here...

The screenshot shows the "API Configuration" page in a customer portal, similar to the one above. The navigation menu and instructions are the same. The form titled "Configure API - US Customers ONLY ENTER SPOT API" is displayed on the right. In this version, the "SPOT API KEY" section is highlighted with a red rectangular box. This section contains three input fields: "Spot API KEY", "SPOT SECRET KEY", and "Spot Secret Key". The "FUTURES API KEY" section is present but not highlighted. The "LEVERAGE" and "MAX USDT AMOUNT PER TRADE" fields and the "Update Settings" button are also visible at the bottom of the form.

## LEVERAGE

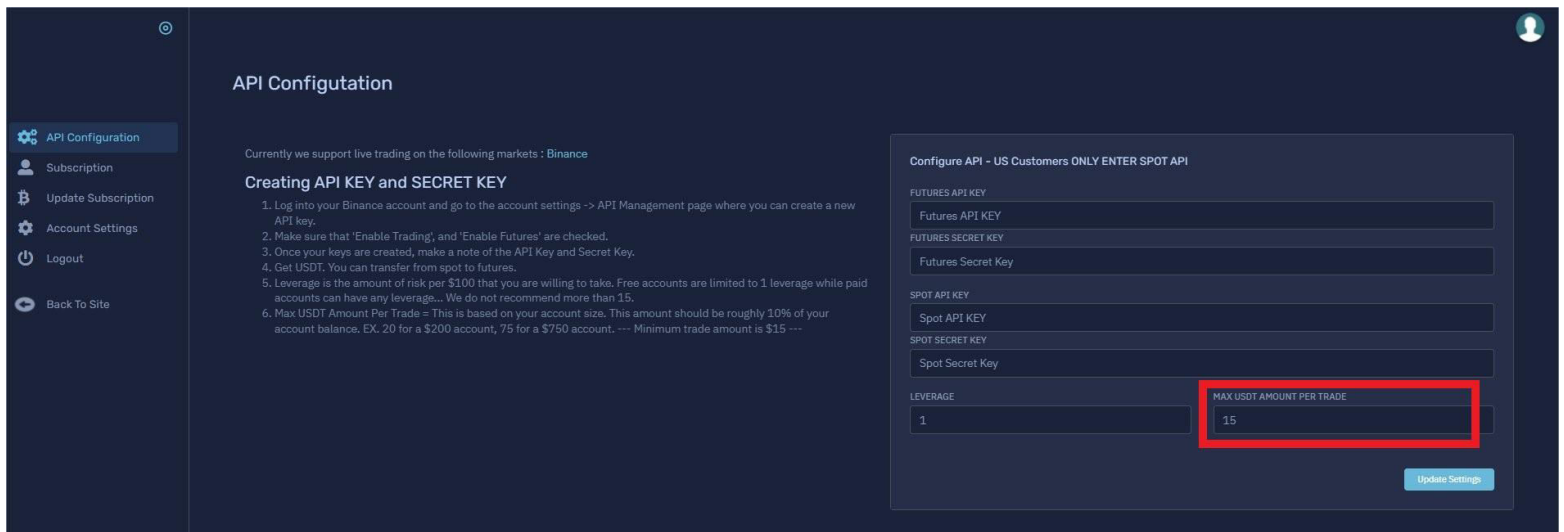

Next, you will need to select your risk tolerance... This is done by choosing your Leverage and Lot size. We recommend using LOW leverage as fees will be lower and the trades will be safer. A great rule of thumb is to run the system at a 1 Leverage and a lot size of 10% of your account balance. EXAMPLE → If you have a \$1000 account, your Leverage would be 1 and your Lot size would be \$100. For more risk/reward, you may want to increase the lot Leverage up to a recommended maximum of 5. Enter your Leverage here...

The screenshot shows the 'API Configuration' page on a dark-themed interface. On the left is a sidebar with navigation options: API Configuration (selected), Subscription, Update Subscription, Account Settings, Logout, and Back To Site. The main content area is titled 'API Configuration' and includes a sub-section 'Creating API KEY and SECRET KEY' with a list of six numbered instructions. To the right is a form titled 'Configure API - US Customers ONLY ENTER SPOT API'. The form contains several input fields: FUTURES API KEY, FUTURES SECRET KEY, SPOT API KEY, SPOT SECRET KEY, LEVERAGE (highlighted with a red box and containing the value '1'), and MAX USDT AMOUNT PER TRADE (containing the value '15'). An 'Update Settings' button is located at the bottom right of the form.

## Lot Size

Now you will need to select the Lot Size that will be traded. The lot size is the USDT amount that will be traded. As stated earlier, the recommended trade amount is 10% of your account balance. There is a 15 USDT minimum to trade on the Binance.com platform.

This screenshot is identical to the one above, showing the 'API Configuration' page. In this version, the 'MAX USDT AMOUNT PER TRADE' input field is highlighted with a red box and contains the value '15'. The 'LEVERAGE' field is also visible and contains the value '1'. The rest of the page layout, including the sidebar and instructions, remains the same.
